

Fund Objective

SDGA tracks the Morningstar Societal Development Index, which is designed to provide exposure to companies worldwide with strong policies and practices relative to the United Nations Sustainable Development Goals and are actively engaged in the 47 Least Developed Countries (LDCs).

- **Broad Global equity market exposure.** SDGA is designed to provide broad market exposure to Morningstar Global Markets Large-Mid Index, comparable to that of the MSCI All World. With SDGA, investors may achieve broad equity market returns while driving social change.
- **Innovative Model for Social Impact.** Impact Shares is a 501(c)(3) nonprofit organization, and as such the net advisory proceeds are not passed on to a traditional asset management firm in the form of profitability. Impact Shares gifts the net advisory proceeds back to the UNCDF last mile financing vehicle. This provides an additional funding source for risk capital of small to medium-sized businesses in the 47 LDCs to build modern health, communication, financial, and food infrastructure among other resources.
- **Rigorous, transparent, measurable standards.** The index reflects a collaboration between UNCDF, Impact Shares, Sustainalytics, and Morningstar. Companies go through a rigorous analysis and are included and/or excluded based on the following five screens:
 1. **The first screen uses the UN Exclusionary Criteria** as defined by the United Nations Development Programme in its 2013 policy on Due Diligence and Partnership with the Private Sector. This screen excludes Companies working in fields such as nuclear weapons, alcohol, etc., .
 2. **The second screen includes those companies that are signatories to the UN Global Compact**—a voluntary initiative where CEOs make commitments to implement universal sustainability principles and take steps to support UN goals, including the SDGs.
 3. **The third screen excludes companies that have a high controversy rating** on issues including business ethics, governance, social issues, environmental impact, supply chain, or community incidents.
 4. **The fourth screen scores companies based on 32 customized environmental, social and governance (ESG) indicators assessing companies' alignment with the United Nation's Sustainable Development Goals** which include bribery and corruption, employee working conditions, supply chain monitoring, human rights, etc., Companies with low scores are excluded.
 5. **The fifth screen scores companies based on share of revenues** generated in LDC's and to lower income and lower income countries Booster: companies with a higher share of revenues generated in LDC's receive a "boost" through a multiplier that can increase their overall index score. The companies with the highest index scores are included in the ETF.

Impact Shares
